

Cooperative Application Development User Community (CADUC) Charter

CADUC is for:

- Groups within UC, Children's and UC Health who provide application development and want to leverage existing expertise across the institutions.

The purpose of this community is to:

- Provide a way for disparate groups to share knowledge, ask questions and discuss topics.
- Provide a library of tips and best practices related to application development.
- Broadly - work towards a functional service-oriented architecture (SOA).
- Create efficiency; avoid "reinventing the wheel".

Communications to this group will include:

- A (UC) BMI-hosted webpage with a summary of everything and a wiki for discussions.
- Periodic emails sent by the moderator regarding updates.

Group moderator:

- John Meinken UC BMI.

Getting questions answered:

- If you have a question, we encourage you to post it in the group discussion board so that everyone can benefit. If it's a private question, you can contact the group moderator.

Responsibilities of group members:

- Find and learn what you need.
- Share feedback, information and, if appropriate, code.
- Make available to all group members any events or informational sessions that are not strictly internal which might be of interest.
- Network and share with other members, such as responding to questions or inviting group members to your facility from time-to-time.
- Help other members by sharing your experiences, tips and ideas by writing in the group blog post or adding to the group wiki.

Initial Community:

UC BMI
CCHMC BMI
CCHMC IT Development & Innovation UC CECH
UC App Lab
UCit COM-IT

Potential Future Community:

UC DAAP
UC Libraries
UC Health
Cincinnati VA

First Steps:

Build and host site with list of members, inventory of skill sets and examples of type of applications built.
